Introduction

Warning Options

- Web Configurator
- Nebula Networking
- Nebula Control Center (NCC)

Hardware Connections

1 Connect the **Ethernet** port to a PoE injector, PoE switch or router using an Ethernet cable.

2 Connect the **Console** port to your computer using a console cable.

3 Connect the **USB** port to a USB storage device.

4 Connect the **Reset** button to reset the device to its factory default settings.

5 Connect the **Kensington lock** slot to a Kensington lock to secure your device to a fixed object.

6 Connect the **Power** port to a power source using the included power adapter.

7 Connect the **Ground** wire to a grounding terminal.

8 Connect the **Antenna** to the device.

Management Options

Nebula Management with the Web Configurator

Nebula Management with the Web Configurator

1 Connect to a power source and connect the device to the Internet.

2 Create an account and register the device in the Nebula Control Center (NCC).

3 Configure the device using the NCC.

Nebula Management with the Web Portal

1 Connect to a power source and connect the device to the Internet.

2 Create an account and register the device in the Nebula Control Center (NCC).

3 Configure the device using the NCC.

Standalone Management with the Web Configurator

1 Connect to a power source and connect the device to the Internet.

2 Access the Web Configurator.

3 Configure the device using the Web Configurator.
