

Firmware Release Notes

WAP3205

Release V1.00(BFR.8)C0

Date: 2014/03/19

ZyXEL WAP3205

Release V1.00(BFR.8)C0

Release Notes

Date: March 19, 2014

Supported Platforms:

Zyxel WAP3205

Firmware version:

V1.00(BFR.8)

Limitation:

Known Bug:

1. When user change to AP mode, the LAN will change to "User Defined LAN IP Address"
2. When WAP3205 is UR Mode and enable multiple SSID, wireless client connect SSID1(not default SSID) and wireless client can not access internet. It is normal, because WAP3205 default enable NoFordingBTNBSSID.

Client))) WAP3205))) NBG419Nv2 -- Internet

PC -----

Modification | 2014/03/19:

[FEATURE ENHANCED]

[BUG FIXED]

1. Fix like 130501100#NBG419N / security risk with hacking nbg and stole wifi password
(user input url "http://192.168.1.2/index.asp%5C..%5Clocal%5Cwireless_security.asp%2F", it will show information at browser)
