Benefits

Higher Speed Internet Access and Wider-range Wireless LAN Connectivity

ZyXEL P-660HW Series is an all-in-one affordable router, compatible with high-speed ADSL, ADSL2 and ADSL2+ interfaces over existing copper lines. With speed up to 12 Mbps (ADSL2) or 24 Mbps (ADSL2+), the P-660HW Series offers higher data transfer rates and better bandwidth than traditional ADSL gateways. With ZyXEL's Wireless g+ SuperSpeed* technology, the P-660HW Series delivers unbeatable wireless transmission speeds at up to 125 Mbps. This makes the P-660HW Series your first choice in expanding your network reach.

Zero Configuration Technology

With Zero Configuration technology, the P-660HW Series installation is quick and simple, allowing users to hook up a DSL connection without hassle.

Media Bandwidth Management (MBM™) Quality of Service (QoS)

The P-660HW Series enables network administrators to allocate network resources and to guarantee Quality of Service (QoS). The Media Bandwidth Management (MBM) function prioritizes media services, and increases productivity and efficiency in daily operations by tailoring a system to specific demands such as VoIP, video streaming, video-conferencing or MP3 applications.

Easy Setup with Multimedia Auto Provisioner Express (MAP Express)

The MAP Express mechanism offers the P-660HW Series a friendly and quick installation GUI. With ZyXEL's "MAP Express Install 1-2-3" installation guide, the configuration can be done in a snap, and its rich audio and visual aids are even fun to use.

*125 Mbps, as opposed to the standard 54 Mbps speed of 802.11g and 11 Mbps of 802.11b, actual performance may vary depends on real environment.
