Benefits

802.11ac for data transfer rates of up to 867 Mbps

With the new-generation 802.11ac wireless standard, ZyXEL's NWD6605 provides high wireless throughputs of up to 300 Mbps* at 2.4 GHz or 867 Mbps* at 5 GHz. The NWD6605 is backward compatible with all your current wireless Routers or Access Points and offers better wireless performance for video streaming and online gaming.

Dual-band avoids network clutter and optimizes HD media experience

The ZyXEL NWD6605 provides users the ultimate visual experience over the dual-band network and takes advantage of the common 2.4 GHz band for Web browsing with faster speeds or the interference-free 5 GHz band for smooth HD video playback and online gaming.

Dual internal and external antennas reach a wider coverage for good network connection quality even you are a distance away from the wireless router or access point.

USB 3.0 interface for high-speed network experience

With transfer data rates of up to 5 Gigabit per second, the USB 3.0 interface is 10 times faster than USB 2.0. The NWD6605 adopts USB 3.0 interface to realize the true high-speed network experience.

Easy setup with Wi-Fi Protected Setup (WPS)

The friendly one-touch button design provides an easy, intuitive way to setup a secure wireless network. Just press the WPS button to enjoy the protected network in seconds.
