The Mitel 622dt DECT Handset is the business level handset model in the Mitel SIP-DECT family. The 622dt handset is made from plastics that are protected with a silver-based treatment from BioCote Limited that inhibits the growth of certain viruses and bacteria on handset surfaces by up to 99.9%*. Ideal for DECT users in shared workspaces.

Redesigned Handset

The new handset comes with a new design and color scheme. The keypad includes a new coating for better durability for frequent usage and simplified cleaning. The handset has been tested in real-life abrasion based on DIN Standard by an independent laboratory.

Designed for Your Business

The user-friendly Mitel 622dt are the high-end handset for the professional. Many freely programmable keys support the simple navigation and the use of different lines. Equipped with a Bluetooth® interface for a cordless headset, Mitel 622dt allow maximum freedom of movement. The high-quality lithium-ion battery can be charged via the USB interface, independently of the charging bay. The headset socket remains accessible, so calls can still be made via the headset while charging is in progress.
